BUTTERFIELD TUNNEL IDLE MEN WILL WORK

Up By Litigation.

MILL IS AMONG THE EARLY SIXTY THOUSAND WILL NOW BE SPRING PLANS.

This week teams are harling 150 tons of ore from the mouth of Queen tunnel over Butterfield divide to Rogers' Association of Iron and Steel Workers and difficult of any in West Mountain the wage scale that will be effective district, and eight horses are required until July, 1901. on an ordinary load to the top of the or an ordinary load to the top of the divide, says the Bingham Bulletin. A charge of \$1.50 per ton is made for hauling. The ore comes from drifts at the 300 level of Eagle Bird mine, run right and left, the faces of both being all in same kind of material. It looks promising, and we are assured will pay a good margin, being hauled this fall for the purpose of clearing the dump. A mill is to be built in the spring at the mouth of Queen tunnel. It will be all in same kind of material. It looks promising, and we are assured will pay a good margin, being hauled this fall for the purpose of clearing the dump. A mill is to be built in the spring at the mouth of Queen tunnel. It will be a comparatively small affair, as all milling will ultimately be done at the mouth of Butterfield tunnel. Queen tunnel taps Eagle Bird vein at 800 feet on the dip, whereas the Butterfield will enter it and Mountain Chief vein 1,400 feet (1,000 feet vertical) below the Queen.

Queen.

The Butterfield tunnel—a grand work (7x9 feet) and flowing 450 gallons of water per minute—cuts a number of good veins that have never even been prospected by the drift; so that it may be said the company has hardly made a beginning so far as actual mining is concerned.

ure and on a large scale seems as conditions that have been assured, as conditions that have been waited for are shaping. The company, e French corporation with abundant means, practically suspended operations in 1893, and has not resumed, owing to a series of discouragements of which the repeal of the Sherman law and fall in price of silver was the beginning. Next followed the big siump in lead, ruling until the Dingley tariff took effect. Then came the celebrated Herriman-Butterfield water suit, seriously affecting the company's interests, that has been dragging through the courts and is not yet settled, while a suit practically involving title to the great Eagle Bird vein has only just been decided in the company's favor en decided in the company's favor

as owner of the apex.

The Butterfield company has expended upwards of \$250,000 in machinery and improvements, including the long tunnels and Eagle Bird and Mountain Chief developments. It has as a whole the heaviest and finest mining machinery in Bingham, equipped for running by both steam and water power, and housed in first-class buildings. With the Butterfield tunnel extended to the Eagle Bird and Mountain Chief, and suitable reduction works installed at its mouth, the company could soon the company could soon shape its affairs to give employment to a hundred men and become a dividend payer. There seems no present reason to doubt that before another year closes the But infield property will be operated on a ge scale.

OPERATING NEAR GRANITE.

Mike Mahoney Will Put in a Five-Stamp Mill This Fall.

(Baker City Democrat.) M. D. Mahoney, who, a few years ago, was one of the leading spirits in developing properties in the Virtue district, is now as vigorously prosecuting development work in the Granite district. At present he is running a 600-foot tunnel on his property, the Alma. A five-stamp mill will be erected this fall. The ore, he says, is low grade, and will hardly bear freight charges to distant points, and the best way is to arrange for treating it at home. He has plenty of \$10 rock, which he says will ried good returns when once means are secured for mining and milling it cheaply. "Mike" owns several good claims at "Mahon by Camp," near the stage road between Sumpter and Granite, on Bull Run creek. trict. At present he is running a 600-

Bingham Bulletin: The movements of a party of surveyors, who arrived in camp Wednesday and are engaged in running a line up Main canyon on the east side, are eliciting a great deal of comment. No one in Bingham seems to be definitely informed, though an impression generally prevails that an impression generally prevails that an extension of the Rio Grande Western's Bingham branch to furnish direct outlet for the Bingham C. & G. company's mines is contemplated. A switch-back on Winnamuck hill and another on Niagara hill are among rumored grade details.

Warning to the Public. Before buying Buckeye Mining company stock, verify same by telephoning the secretary, No. 598. There are thousands of shares of illegally issued stock

Big Bingham Enterprise Held Steel Mills Start After Three Months' Closing.

WILL RENEW WORK SOON WAGE SCALE IS SIGNED

Cincinnati, O., Sept. 23.-A confer ence committee of the Amalgamated The road is the most precipitous and of the manufacturers today signed

Some mills will start tomorrow, and all others as soon as possible. This decision means employment tomorrow to over 60,000 workingmen, who have been idle since June awaiting the adjustment of their wage scales. Meantime the wage conference committee of the Amalgamated Association of Iron and

the wage conference committee of the Amalgamated Association of Iron and Steel Workers has had five different conferences with the manufacturers at New York, Indianapolis and Youngstown, as well as here.

They have been in conference here since Wednesday, and determined last night to sit until they got what they wanted, yet both sides felt relieved when the scale was signed after an all-night session, and most of the conwhen the scale was signed after an all-night session, and most of the con-ferees left without sleep so as to be at

he mills Monday morning.

President Schafer, Secretary Williams and others remained to arrange some details with Commissioner Nutt, and they retired about 8 o'clock this morning, but the others did their sleeping on the trains en route home for the general resumption tomorrow.

Reasons For Delay.

The reasons for the delay in adjusting the wage scale, as well as for the frequent prolonged conferences, are due to a siump in the market and the fluctuations during the past year from highest to lowest prices. Workers wanted \$5 per ton, based on a one and four-tenths card rate. The manufacturers offered \$4.50 per ton on a one-cent card rate for boiling, and the differences were in about the same proportion in other lines. President Shaeortion in other lines. President Shaefer and Commissioner Nutt jointly gave out the following official statement to-

The rate for boiling is \$4.75 per ton. "The rate for boiling is \$4.75 per ton, based upon a one-cent card rate, with the same basis running up to one and two-tenths for the card rate, or \$1.20. But the price for boiling for September and October shall be \$5 per ton, based on a card rate of one and fourtenths cents. Rolling shall be one-seventh of the price paid for boiling." Among the mills ordered started are those of the American Steel Hoop company at Girard, Youngstown, Warren, Pomeory and Greenville, and of the Pomeory and Greenville, and of the Republic Iron & Steel company at Youngstown, Ironton, Terre Haute, Birmingham, Muncie, Franklin, Mar-ion, Moline, New Albany, Minneapolis, Covington, Ky., Brazil, Ind., Spring-field, Ills., and Alexander, Ind.

FAMOUS OLD PRISON.

The History of One That Is Known All Over the World. (New York Telegraph.)

"Old Bailey," the most famous prison in England and second only to the Bastile in France for historical significance, is about to be demolished. This prison, which, for 600 years, has been a terror to criminals, will soon be pulled down, and a magnificent structure, embodying all the latest ideas in sanitary inventions, will be built.

the stage road between Sumpter and Granite, on Pull Run creek.

Tintic Miner: Dan Martin and M. F. Sammon have two men at work on the Town View. The shaft at seventy feet depth has struck a body of manganeze and iron which they expect will certainly make ore.

Mining Notes.

Ella C. Steffenson and Florence Horne as programme committee. This work designs the past week.

The case of Lincoln county, Nevada, against the DeLamar and April Fool mines has been decided in favor of the place was rebuilt end enlarged in the various schools of the county since to questions that have arisen in the various schools of the county since of manganeze and profitable.

Min 1773 the original structure was destroyed, and on the site was built a court house. This work of 1780, as readers of "Barnaby Rudge" will remember, and the place was rebuilt end enlarged in the various schools of the county since of the stroyed, and discussion took place relative to questions that have arisen in the various schools of the county since of the stroyed, and on the site was built as tive to questions that have arisen in the various schools of the county since of the school have visited the school dare visited the school dave visited the school have visited the school have visited the school have visited the school have visited the school are provided for the school have visited the school have visited the school have visited the school have visited the school as trive to questions that have arisen in the various schools of the county

"The name is legion" might well be

ganeze and from which they expect will certainly make ore.

Tintic Miner: The famous old Gold Blossom mine in North Tintic, which was responsible for the big mining excitement nine years ago, shipped a carload of ore this week. It is predicted that the Gold Blossom will yet be a winner. We are unable to learn the returns of the shipment.

The experts who have been examining the Chainman property at Ely. Nev., have departed for the east to report to the capitalists by whom they are employed. It seems to be a foregone conclusion that the latter will purchase the property.

Reno Journal: The cash balance of the Consolidated California & Virginia company has been swelled to \$\$,205.38 by the receipt of \$6,887.67 from the eight cars of ore reported in the last financial statement. There are four more carloads at the smelter, returns from which can shortly be expected.

Tuscarora Times-Review: Leonard Gifford and Frank Curieux came in finite of the condition.

The name is legion" might well be said of the celebrated criminals who have heard their fate in that historic dock. Among the political office, and Frank Curieux came in the last eight cars of ore reported in the regicides are most memorable. Out of the twenty-one prisoners arraigned in 1660 twelve were executed, while seven paid for their part in the execution of Charles I by lifelong imprisonment.

A tragic episode in the history of the court by the jail fever during the sessions of May, 1750. The fever obtained such a hold in the neighboring prison that it forced a way into the court, causing the death of the judge of the common pleas. Sir Thomas Abney, Barron Clark, the lord mayor, and several other members of the bar and of the judy. These plagues were directly consequent to the lax sanitary laws. Little was known of the art of artificial ventilation. The prisons were in shock-ing condition.

more carloads at the smelter, returns from which can shortly be expected.

Tuscarora Times-Review: Leonard Gifford and Frank Curieux came in from Bull Run last evening for a load of lumber. They report work on, the new mill as rapidly nearing completion. The materials for the cyanide plant will be on the ground this week, and the entire plant is expected to be in operation by the first of the month. Wood River Times: John I. Minear, son of A. P. Minear, the well known mine promoter, and C. M. Thayer, a capitalist of Boston. Mass., who is interested in mines in Cripple Creek, Colo., in Joplin, Mo., and on Prince of Wales island, Alaska, arrived last Tuesday and left today for Custer county, where they are going to look into a mine proposition. They expect to return to Hailey in one week, and to stop here for a couple of days, as Mr. Minear wishes to look over the district and familiarize himself with its present output and promising future.

Bingham Bulletin: The movements of a party of surveyors, who arrived Indians in Florida.

Indians in Florida.

There are today but three bands of There are today but three bands of Seminoles left in Florida. So completely have these people been disintegrated that no tribal relations now exist between them; they have no acknowledged thier and they recognize no man's authority. They number about 600.

The Health Problem

The Health Problem is much simpler than is sometimes supposed. Health depends chiefly upon perfect digestion and pure blood, and the problem is solved very readily by Hood's Sarsaparilla. You may keep well by taking it promptly for any stomach or blood disorder. Its cures of scrofula, sait rheum, catarrh, dyspepsia, rheumatism and other diseases are numbered by the thousands.

The favorite family cathartic is

It is a subject of frequent remark re in school work this year. No year has een at the threshold of the year's work better outlook than the present one. It is a matter of great encouragement that this is the case, as the work last year was left incomplete and must be finished, together with the regular rou-

tine, this year. There is no doubt but that the corps of teachers in the various buildings have been materially strengthened this year. This has been possible because of the fact that Superintendent Cooper is now more familiar with the ability of the teaching force, and could make more satisfactory assignments. No new departure will this year be taken, but attention will be directed to strengthening features introduced in recent years. There is no doubt but that the corn

years.

Salt Lake seems to be in the van in introducing recent contributions to educational literature and pedagogical reforms. The Speer arithmetic, which has been in use here for the past three years, has not yet found its way into the best schools of the east, and some superintendents have declared that they will introduce the work as soon as they will introduce the work as soon as a suitable teacher can be found who a suitable teacher can be found who can successfully present the subject. The course of study which has been greatly delayed is now ready for use. In the main, no changes have been made, although slight modifications have been made in language, geography and arithmetic. The superintendent has made some valuable suggestions to teachers under the heading, "Some Things Advisable and Not Advisable," which will be duly appreciated.

Miss Crozier of Oahu college, Honolulu, is visiting Mrs. J. G. Anderson.

Christian Lund, who has taught at Ephraim the past two years, will attend the university the coming year.

Professor George H. Marshall, principal of Wasatch academy, Mt. Pleas-ant, was a visitor at the Lincoln and Oquirrh schools on Wednesday.

A very interesting and profitable meeting with mothers was held at the Bryant school last Monday. This is the first of several which will be held in that school this year.

Supervisor Elliott desires to meet the Supervisor Elliott desires to meet the teachers in the art room this week, as follows: Third grade, Tuesday, Sept. 25, 4 p. m.; fourth grade, Wednesday, Sept. 26, 4 p. m.; fifth grade, Thursday, Sept. 28, 4 p. m.

The following publications have been received by State Superintendent Park and placed in the Utah state public school library: "School Time and Play Time," Cooper & Pratt; "Discoverers and Explorers," Shaw; and course of study for the schools of North Dakota.

The following free normal scholarship appointments to the State university were made by State Superintendent Park yesterday: Nellie Williams. Coalville; Florence Gee, Tooele City, and Joseph T. Wilkinson, jr., Iron county.

The schools of the county will close on children's day at the State fair, Friday, Oct, 5, and will participate in the proceedings of that day with the children from the city.

dren from the city.

Superintendent W. S. Marks of Tooele

Superintendent W. S. Marks of Tooele county called upon Superintendent Ashton of Salt Lake county on Friday.

A meeting of the primary section of the Salt Lake County Teachers' association was held in the city and county building yesterday. An organization was effected by the election of Mrs. Matilda J. C. Sanford, president; Richard S. Jorne, vice president; Miss Mary Boberg, secretary, and Misses Ella C. Steffenson and Florence Horne as programme committee. This work

Mr. Knudson was a visitor at the Oquirrh on Thursday.

Agricultural College.

represented by J. R. Bens, reported their investigation, and advised that since the Salt Lake and Ogden city schools were not going to be represented, on account of so much interference in last year's work by sickness, that the county make no further effort, allowing that the time for preparation of creditable work is too short, unless last year's work be used.

The "talk" on busy work by Miss Elizabeth Orth of the Ogden city schools was indeed a pleasant surprise to the large number of teachers present. After speaking of visits to schools in Chicago and Buffalo for special instruction, and touching slightly upon her present anticipations and expectations in the line of busy work, the presentation of the subject was taken up. A collection of work was exhibited with an abundance of explanations interspersed with profuse blackboard illustrations which commanded and held erspersed with profuse blackboard il-istrations, which commanded and held

lustrations, which commanded and held the attention of every teacher.

None could doubt the excellent ability of Miss Orth in her work, and all who listened to the talk can very safely say she has many happy and busy students in her department.

Superintendent Wilson cited the law respecting the attendance of teachers at the official institute, and requested written excuses from those who might be unable to attend.

High School Notes.

With an enrollment of 708, the larges With an enrollment of 708, the largest in the history of the school, the High school starts out the new school year under the most favorable auspices. Few changes have been made in the teaching corps. Miss Clarahan and Miss Corbin, the former from the eighth grade of the city schools and the latter from Knox college, take work in English and algebra; Mr. Clark takes the work in chemistry, and Miss Allen of Western Reserve university, and Mrs. Travis of Michigan university are assistants in the biological department. Under the executive management of Mr. Eaton a successful year seems assured.

Miss Hall, Mr. Wetzell and Mr. Stan ley are missed from the school this year, and Miss Hall has the sympathy of students and teachers in her tedious

The school enjoyed the talk given by R. J. O'Hanlon, Thursday morning, on the subject of the "Humane Society and Humanity." Mr. O'Hanlon is national organizer of the national association of humans societies.

Principal Marshall of the Wasatch academy at Mount Pleasant was an in-terested visitor at some of the science classes Friday morning.

Professor F. W. Smith, the new principal at Hammond hall, has been a visitor to several of the laboratories during the past week. The painting by Mr. Harwood, which

now hangs in the shadow-box, has been kindly loaned to the school by Miss Mackintosh. It is one of Mr. Harwood's best as well as largest canvases representing Utah scenery.

The first, second and third elevens have been formed and while their ganization has not been completed, some good practice games have been played, and some strong new material is being developed. Nearly all of last year's championship team are back in school, and rival teams may look for some surprises, as has been common in past years. The school team has elected Frederick Smith captain and Clarence McFadden manager, and the second team is managed by Joseph Jeremy, while Hyrum Bergstrom is acting captain. emy, wh captain.

Mr. Critchlow and Mr. Bamberger of

Miss Susan G. Stokes of the high school, accompanied by several of her pupils, enjoyed a field excursion yesterday.

New recitation accommodations have been provided for the chemistry and biology classes, and a number of valuable additions have been made to the equipment of physical apparatus. Monday, Tuesday and Wednesday, Sept. 24, 25 and 26. Choicest Ladies' Hats and Millimery. Ladies are special-ly invited to the three days' exhibition.

pupils, enjoyed a field excursion yesterday.

Supervisor Holton will hold a meeting of teachers who are new in her department of work in the teachers' room at the city and county building on Thursday afternoon.

Friends of Miss Nellie Pettit have been pained to learn of the sorrow that has come to her by reason of the death of her little niece, who died last week. Miss Pettit will resume her duties at the Lincoln school tomorrow.

Miss Mamie Malin, a former member of the high school, will teach in Tooele City this year.

A mothers' meeting the faculty held its first meeting this fall in the old university building. Arrangements were made for the entrance examinations on Wednesday, Thursday and Friday next, Sept. 26, 27 and 28. Professors D. R. Allen, W. N. McCoy, M. M. Babcock and O. P. Seward and Instructors Joseph Hadley and L. E. Young were named as the examining Tickets on sale from farther points, Oct. 1 to 6, limited to Oct. 15, and from near points Oct. 2 to 7, limit Oct. 12. Special trains from Ogden, Tooele and intermediate points. For particulars see Oregon Short Line agents.

The grammar section of the Sait Lake
County Teachers' association will meet in the old university building on Satcommittee. The tests will be given in the new buildings. It was further decided that inasmuch as there will be so much confusion in moving the apparatus, library and museum, that the university make no exhibit at the state fair this October.

Agricultural College.

The fall term of the college opened on Tuesday. Up to Friday night about 130 students were enrolled.

Trustee Hansen was among the visitors at the college during the week.

Mrs. Marshall of Seattle, Wash., was at the college on Thursday with her son, who is to take a special course preparatory to mining.

Professor Close spent Wednesday and Thursday in Ogden inspecting some fruit experiments instituted in the spring.

Mr. Hill and Miss Baker, new instructors in the English department, are domiciled at Professor Caine's. Their classes are domiciled, together with those of Miss Moench, on the third floor next to the museum.

Governor Roosevelt and party were on the college grounds Thursday morning. College work was suspended from 11 o'clock until 2 o'clock.

SUCCESSFUL SCHOOL INSTITUTE.

Original and Instructive Address By Miss Orth of the Ogden Schools.

The second official institute of the Weber county trachers convened in the commissioners' room in the court house, Superintendent W. B. Wilson presiding.

building and will be laid around the physical building and the library during the coming week. The new desks and settees for the class rooms upon the hill have arrived.

Lord Salisbury's Manifesto on Coming Election.

Mr. Harry R. Holmes, the new instructor in mathematics and gymnasium, arrived in the city Friday night. In company with Mr. Horace Sheely, who has been drawing plans for laying out the new athletic campus, he visited the east bench yesterday afternoon, surveyed the grounds and inspected the buildings.

All the electric wires used to supply the new buildings with light and power will enter them through the tunnel, thus leaving the grounds and campus free from poles and wires.

man scientific periodical, has comple-mented Professor Joseph F. Merrill by asking him for an abstract of his paper on the "Silver Vollameter," published in

Dr. Hoover of Montpelier, Ida., visited the new buildings last week.

Professor R. H. Bradford and wife left for Columbia last Thursday, where Mr. Bradford will prosecute his studies

All of the graduates from the kinder-garten course have secured positions, and there is still a demand for others. Kindergarten schools will be opened in the Emerson school, in the old uni-versity building, in the Thirteenth ward and in the new normal university build-ing.

sitance or agitation."

After remarking that "all the recent troubles in Souch Africa have been due to a shift of parliamentary opinion at a critical moment," the prime minister goes on to say:

"It will depend upon the disposition and conduct of the Boers how long an interval is to elapse before their full position as a British colony is attained. The brilliant success of Lord Roberts' army must not bilind us to the imperfections disclosed in our own defensive army, imperfections which, but for the war, might have remained unnoticed. It will be the urgent duty of parliament and the government to remove these defects, a duty which certainly could not be discharged by a ministry dependent upon a broken party."

Difficulties In China. Difficulties In China.

In conclusion, Lord Salisbury refers to China as "A difficulty, among others, confronting the government and requiring that the government should be armed with a strong majority in the house of commons." He urges that, in view of all these considerations, there should be no abstentions at the polls.

Mr. John Morley, liberal member for Montroseburgs, in his manifesto, declares that his opinion has not changed, that everything might have been attended in South Africa without war. "In a single year," he says, "the work of a generation in uniting the Dutch and English in South Africa has been undone, and not even in Ireland has the difficult race problem been more miserably misnalled."

Mr. Morley admits, however, that it is the difficult race problem been more miserably misnalled."
